

# LUBRICANTS

Strong  
type

## NX22 MOLLY ATTACK

Item Number : 00022

**High concentration Molybdenum disulfide paste spray**  
(not molybdenum grease)

### FEATURES

- Keep high lubricating effects from low temperature to high temperature ( $-30^{\circ}\text{C}$  to  $400^{\circ}\text{C}$ ).
- It perform strong extreme pressure and extremely low friction factor.
- Lubricity will increase when mix with lubricating oil.
- It forms moist molybdenum disulfide film. Maintains high chemical stability and possible to use on locations immersed in water or organic solvents.

Content : 300 ml

### APPLICATIONS

- Prevents high pressure frictional and rotating parts from burning, friction, squeaking and cracking for machine tools such as Automobile Spline, Clutch, Transmission gear, cylinder wall, Camshaft, Piston pin & ring, Crankshaft, oil seal, bearing, Differential gear etc. .

Lubricant transmission gear

### PERFORMANCE

Friction coefficient of Pendulum

Style Friction Test 0.10

Load test (4-Ball test: 200rpm) 0.75MPa

Applicable temperature  $-30\sim 400^{\circ}\text{C}$

Penetrate	High	★	Low
Pressure	High	★	Low
Anti-rust	Long		Short
Viscosity	High		Low
Adhesive	High	★	Low

Prevent from burnt screw stacking
