Introduction:RS-1400-10FP is micro prismatic PET reflective film (glue backing),the reflectivity can reach 100-150 cd/lux.m2 of white color,due to the feature of high reflectivity and tenacity,it is widely used in Curtain sided,trailer,vehicles,tankers or some dangerous signs etc.

Product Name: Micro-prismatic reflective tape,Glue backing

Printing quality : ECE 104R

Top layer: PVC with untearable PET on surface

Pattern:Rhombus on surface

Standard Size:5cmx25m , 5cmx45.7m per roll

Color:White,yellow,red etc

Color of release paper: transparent

Adhesive Ingredients: permanent pressure-sensitive adhesive

Suitable substrate for decals: Aluminum, steel

Operation temperature: 18°C~28°C

Working temperature: -20°C~60°C

Reflective index: 100-150cd/lux.m2 for white color

Package:20 roll/ctn,suitable for international transportation

Store:Pls keep in cool and dry warehouse

Application:

Widely used for road traffic signs, vehicle marking, temporary road traffic reflective signs, billboards, cards mine safety, traffic cones, reflective anti barrels, and other reflective products.Work zone signage; Advertising signage;

REFLECTIVE PROPERTIES for RS-1400-10FP:

Entrance Angle/ Observation Angle is 5°/12'(0.2) , its typic performance is 100-150cd/lux.m2 for white color.
