SKINERGATE™

Our products

SKINERGATE™ is Made with a flexible and moisture-permeable polyolefin film and a highly moisture-permeable acrylic adhesives. This tape is extremely low-irritant. Attaching securely and easily cut by hand, it is good for gauze fixing.

Key features

- **Stays dry**
Sweat retained in surgical tape causes hydration of the skin, pH changes or an increase of bacteria, resulting in irritation. this tape is extremely moisture permeable, allowing minimal moisture retention even when applied for a long time. SKINERGATE™ keeps the skin dry and prevents irritation.
- **Protects the skin's natural barrier**
The outermost layer of the skin is stratum corneum that serve as a barrier. Removing surgical tapes often strip away this layer, which can cause irritation. SKINERGATE™ is gentle enough to leave this layer intact while still fastening as securely as conventional surgical tapes. It causes minimal water retention in the skin or stripping of the stratum corneum layer even if left on for a long time. This tape makes removal less painful and protects the skin's natural barrier, preventing irritation.
- **Responsive to the movements of the skin**
Surgical tapes often cause a stress on the skin, causing irritation. The backing of SKINERGATE™ is a highly flexible polyolefin film that stretches easily and with minimal force, responding to the slightest movement of the skin. This tape removes the discomfort usually felt and reduces stress on the skin. The tape fits to the skin.

NICHIBAN (THAILAND) CO., LTD.

- **Secure adhesion**

As strong as it is gentle, SKINERGATE™ attaches securely in a wide range of uses.

Applications

- Fixing gauze
- Fixing dialysis circuits

Precautions

- Overextension of tape may cause irritation of the skin.
- Do not apply directly to a wound.
- Discontinue use if a rash, redness or irritation of the skin.
- Remove slowly along the hair line so as not to damage the skin.

Storage

- Store at room temperature, away from water, humidity and direct sunlight.

Specifications

Product number	Size	Per box
SG12	12mm × 7m	24 pieces
SG25	25mm × 7m	12 pieces
SG50	50mm × 7m	6 pieces
